

This is a universal fit guide for any uniform product. To properly fit uniforms, the customer must have their body armor, footwear and Sam Browne duty belt available at the time of the fitting. Uniform shirts will typically fit generously around the chest allowing custom tailoring to the needs and unique body shape of the individual officer.

This guide furnishes measurements in great detail. When purchasing uniforms for tailoring, typically short-sleeve shirts require a neck measurement only. Long sleeve shirts require neck and sleeve measurements. Pants require waist and inseam measurements. Measurements are taken using a typical tailor's measuring tape.

- 1. Chest / Bust:** Measure just under arms, across shoulder blades to fullest part of chest. For women, measure at fullest part of bust. Be sure tape is level and straight. Make sure this measurement is taken while wearing body armor (if applicable).
- 2. Cross Shoulder:** Measure shoulder joint to shoulder joint.
- 3. Neck:** Measure around neck where a buttoned shirt would fit. Be sure measuring tape is snug without being constricting.
- 4. Upper Arms:** Measure dominant arm, muscle flexed at fullest point.
- 5. Forearm:** Measure dominant arm approximately two-inches below elbow.
- 6. Sleeve Length:** Measure from the center back across shoulder around point of elbow to bend of the wrist. Place hand on hip bending elbow.
- 7. Shirt / Coat Length:** Measure front from top of shoulder (highest point of shoulder next to your collar) close to neck down to bottom of fly area.
- 8. Waist:** Measure over shirt, not over trouser, at any position you normally wear your pants/skirts.
- 9. Hips / Seat:** Measure around the fullest part of the seat. Snug, but not tight.
- 10. Thigh:** Measure around thigh, one-inch below crotch.
- 11. Calf:** Measure around fullest part of calf.
- 12. Front Rise:** Measure from the bottom of the waistband (front) to the center point of crotch.
- 13. Back Rise:** Measure from bottom waistband (back) to center point of crotch between legs.
- 14. Inseam:** With the shoes to be worn with the uniform, measure well-fitting pants (similar to uniform pants) along inner seam from crotch seam to bottom of leg. The finished hem length should be from ½" to 1" above the top of your shoe heel.
- 15. Outseam (Optional):** With the shoes to be worn with the uniform, measure from the bottom of your waistband to exactly where you would like your pants to touch your shoes.
- 16. Skirt Length:** Measure from the bottom of the waistband down to exactly where you want the hem of the skirt to end.
